

JOSHUA BURMAN

14155 Magnolia Blvd. APT 102, Sherman Oaks, CA 91423 | C: 818-681-2784 | jleeburman@gmail.com

Objective

My objective would be to efficiently analyze data for the company while creating different strategies and techniques to make testing more precise and accurate. My main objective would be to analyze the data and make decisions to benefit the customer or company based on the given data.

Skills/Coursework

- Proficiency in Python, R, SAS, STATA, JMP, Excel, Word, Data Analysis, and PowerPoint.
- Bilingual (Spanish and English).
- Coursework in Public Speaking, Statistics, Business Law, Accounting, Marketing, and more.
- Ability to analyze data sets, perform computations, and make quick and accurate assumptions of said data.

Experience

Management Trainee Intern Enterprise-Rent-A-Car

06/2017- Current

- As a management trainee I was treated very similarly to a regular management trainee in regards to my duties. I was responsible for selling upgrades, optional protection products, and extra features to customers. While on the business side we were tasked with increasing every aspect of revenue within the business and keep a constant growth for our branch. Along with the work was a presentation in which my group came in 2nd place after presenting our project of increasing corporate business for our respective branches.

Intramural Official Cal Poly ASI

09/2015 to 06/2017
San Luis Obispo, CA

- As an intramural official I did more than just make calls on the field; I settled disputes between players, clearly explained justifications for calls to participants, and worked with ASI supervisors & fellow referees to make sure the games were run efficiently. Worked with supervisors to help make improvements on game times, schedules, and participation fees.

Cashier Robeks

06/2015 to 09/2015
Sherman Oaks, CA

- As a cashier at Robeks I handled money with counting the register at the end of shifts, paying for repairs and supplies, and calculating money lost or money gained on new products. I also worked with the manager to analyze what types of improvements we could afford and what type of results they would lead to, to report to the owner and help suggest different strategies if the end result would be negative.

Education

Bachelor of Science: Economics

June 2018

California Polytechnic State University San Luis Obispo

San Luis Obispo, CA, US

- 3.3 GPA
- Minor in Statistics.
- Concentrating in Quantitative Economics.
